

Dear parents,

Hopefully the children have been telling you about the strange event that happened last Saturday and the small Lego visitors each class has had! We have been using what has happened to write reports and to write letters to our new Lego friends.

On Friday we investigated making parachutes; what made the best shape and material and used this to make a parachute for our new friends to go exploring. (Oleg- Woodpeckers, Olega-

Robins, Oliga- Goldfinches). We put them into a 'hot air balloon' and waved them off on their adventure. This week we received an e-mail from them saying they have landed in Kenya! They have asked us to find out facts about the animals that live there so we have been busy doing this and making posters and booklets. We are looking forward to finding out where they will be exploring next!

Vehicles on the road	Number of vehicles

In Maths the children in Year 2 have been working on data handling, collecting information and showing it in different ways. So far we have looked at tally charts and pictograms. This week we will be moving onto block graphs. The children in Year 1

have been working on matching numerals to the numeral word (2- two, 5- five etc.) and spelling these correctly as this is an expectation for the end of Year 1.

Please help at home by –

- Identifying Kenya on a map and the continent of Africa. What can you find out about the country?
- Researching some of the big animals that live in Kenya (elephant, lion, rhino, zebra etc.) Can they find any interesting or unusual facts? They should be able to tell you lion and elephant facts already!
- Checking your child can read and spell the numeral words 0-20.

Thank you for your support,

The Year 1/2 team
