

17th March 2020

Dear parents,

The last few weeks have been very exciting as we found out the blue footprints belonged to Cornish Pixies! They were very cheeky and caused all sorts of mess!

We made wanted posters for the pixies, thinking of good character descriptions and including the pixies in a story set in a forest or a castle. Yesterday our Lego friends returned with some magical potions. They had been on some amazing adventures to find them and we have written letters or reports to say what had happened.

In Maths we have continued to work on addition and subtraction strategies and used these to help solve equations with missing numbers. We have also done some problem solving to work out which were the naughtiest pixies! This week we have started to look at time; showing o'clock, half past, quarter to and quarter past times.

Please help at home by –

- Practising telling the time.
- Continuing to provide opportunities for children to practise their addition and subtraction skills.
- Continuing to share books and vocabulary, developing the children's language.
- Trying to promote children's well-being in these uncertain times. Although the news coverage is widespread we are trying to minimise the impact on the children and promote a calm environment.

Thank you for your support,

The Year 1/2 team

PS. Although we have had to unfortunately cancel our Celebration of work, we would still like to see and share the children's animal posters for their take-away task so please do continue to send them in. Once we have more certainty over the current situation we will aim to reschedule this as well as the Year 2 maths stay and learn session.
